

**AVOID AVIATION
COLLISION WITH
TRANSMISSION LINES**

IndoDivert®
NIGHT FLASHER

Indolite® is a highly technological organisation, focussing on inventing solutions for Co-Existence of Humans With Wild Life and Aviation Safety. We have over 15 patents in hand.

We are manufacturer of devices for the safety of aircrafts and helicopters from high tension power wire collision.

Our state of art product, IndoDivert- Night Flasher warns pilots about obstruction in their flight path... especially power transmission lines.

This matchless product is light in weight and hangs on power lines at an average gap of 10 meters and is tested for wind speed up to 160 KM / hour

IndoDivert - Night Flasher successfully overcomes the limitations of Span Marker (ball). It comes with red and yellow Sun/ Moon light reflectors and LED lights that flash in blue/ red/ and white colour.

Night Flasher is visible at night and doesn't merge with sunrise or sunset, which is a major limitation with span marker. Besides LEDs, its body glows in the dark and boosts visibility even in low light, fog, and snow. Moreover, it operates on solar cells and runs for 48 hours after charging.

SALIENT FEATURES

- LED Light
- Solar Chargeable Cell
- Radium & Solar Light Vision
- Clear Visibility In Fog / Low Light and Dark Night
- Red & Yellow Reflectors
- Light in Weight and Compact Design
- With Scientific Design

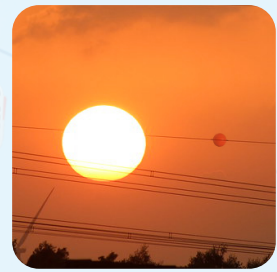

COMPARISON WITH MARKER BALL

Ball colour merges with
Sunset / Rise

Is not visible during
Night when it is
required the most

Due to heavy weight, these are
installed in limited number in one span...
Too much gap makes it infructuous

NIGHT FLASHER

Aviation Lights
(Aviation Warning Light)

Tested for Wind speed
upto 160km / Hour

Powerful Battery and less power
consuming-ultrabright LEDs makes
it work for 48-72 hours in case snow
and low sun light conditions

Due to limited visibility, power transmission lines are hazardous and prone to aviation accident. Collision of aircraft with these lines is mostly fatal for pilot and passengers on board.
